3 of 4

Primary PTCA with Stent to LAD done on 09.07.2026 using stent XIENCE XPEDITION (3.0 X 48MM)

COURSE IN THE HOSPITAL:-

Patient was admitted with working diagnosis of ACS-NSTEMI. Patient was started on dual antiplatelets, statins along with other supportive measures. Relevant investigations were sent. Immediately, patient was taken up for CAG which revealed Single Vessel Disease. Primary PTCA with Stent to LAD was done with one DES. Procedure was uneventful with good end result. Inj. Abciximab was given. Patient was shifted to CCU for close monitoring. Patient responded well to given treatment. Now patient is being discharged in hemodynamically stable condition with following advice and medications.
